

Mezzanine::ManagerBase

Mezzanine::Singleton< AudioManager >

Mezzanine::AudioManager

```
classDiagram
    class ManagerBase["Mezzanine::ManagerBase"]
    class AudioManager["Mezzanine::AudioManager"]
    class Singleton["Mezzanine::Singleton< AudioManager >"]
    ManagerBase <|-- AudioManager
    ManagerBase <|-- Singleton
```

The diagram illustrates the relationship between three classes in the Mezzanine namespace. At the top, there are two boxes: 'Mezzanine::ManagerBase' on the left and 'Mezzanine::Singleton< AudioManager >' on the right. Below them, centered, is a box for 'Mezzanine::AudioManager'. A horizontal line with upward-pointing arrows at both ends connects the two top boxes. A vertical line descends from the center of this horizontal line to the top of the 'Mezzanine::AudioManager' box, indicating that AudioManager inherits from both ManagerBase and Singleton.
