

Mezzanine::ManagerBase

Mezzanine::Singleton< PhysicsManager >

Mezzanine::PhysicsManager

```
classDiagram
    class ManagerBase["Mezzanine::ManagerBase"]
    class Singleton["Mezzanine::Singleton< PhysicsManager >"]
    class PhysicsManager["Mezzanine::PhysicsManager"]
    ManagerBase <|-- Singleton
    ManagerBase --> PhysicsManager
```

The diagram illustrates the relationship between three classes in the Mezzanine namespace. At the top, two boxes represent 'Mezzanine::ManagerBase' and 'Mezzanine::Singleton< PhysicsManager >'. A horizontal line connects them, with a vertical line extending downwards from the center. This vertical line connects to a third box at the bottom, 'Mezzanine::PhysicsManager'. From the top of the 'Mezzanine::PhysicsManager' box, a horizontal line extends to the left, ending in an arrowhead pointing towards 'Mezzanine::ManagerBase'. Another horizontal line extends to the right from the same point, ending in an arrowhead pointing towards 'Mezzanine::Singleton< PhysicsManager >'. This structure indicates that 'Mezzanine::PhysicsManager' inherits from 'Mezzanine::ManagerBase' and is associated with 'Mezzanine::Singleton< PhysicsManager >'.
