

Mezzanine::ManagerBase

Mezzanine::Singleton< ResourceManager >

Mezzanine::ResourceManager

```
classDiagram
    class ManagerBase["Mezzanine::ManagerBase"]
    class Singleton["Mezzanine::Singleton< ResourceManager >"]
    class ResourceManager["Mezzanine::ResourceManager"]
    ManagerBase <|-- Singleton
    ManagerBase --> Singleton
```

The diagram illustrates the relationship between three classes in the Mezzanine namespace. At the top, two boxes represent 'Mezzanine::ManagerBase' and 'Mezzanine::Singleton< ResourceManager >'. A horizontal line with upward-pointing arrows at both ends connects these two boxes, indicating a bidirectional relationship or association. Below this line, centered, is a third box for 'Mezzanine::ResourceManager'. A vertical line descends from the center of the horizontal line to the top of the 'Mezzanine::ResourceManager' box, indicating that this class inherits from or is associated with the base class.
