

Mezzanine::ManagerBase

Mezzanine::Singleton<EventManager>

Mezzanine::EventManager

```
classDiagram
    class ManagerBase["Mezzanine::ManagerBase"]
    class Singleton["Mezzanine::Singleton<EventManager>"]
    class EventManager["Mezzanine::EventManager"]
    ManagerBase <|-- Singleton
    ManagerBase <-- EventManager
```

The diagram illustrates the relationships between three classes in the Mezzanine library. At the top, two boxes represent 'Mezzanine::ManagerBase' and 'Mezzanine::Singleton<EventManager>'. Below them is a box for 'Mezzanine::EventManager'. A horizontal line with upward-pointing arrows at both ends connects the two top boxes, indicating a relationship (likely inheritance or association). A vertical line descends from the center of this horizontal line to the 'Mezzanine::EventManager' box, indicating that it inherits from or is associated with the base class.
