

Mezzanine::ManagerBase

Mezzanine::Singleton< TerrainManager >

Mezzanine::TerrainManager

```
classDiagram
    class ManagerBase["Mezzanine::ManagerBase"]
    class Singleton["Mezzanine::Singleton< TerrainManager >"]
    class TerrainManager["Mezzanine::TerrainManager"]
    ManagerBase <|-- Singleton
    ManagerBase --> Singleton
```

The diagram illustrates the relationship between three classes in the Mezzanine library. At the top, two boxes represent 'Mezzanine::ManagerBase' and 'Mezzanine::Singleton< TerrainManager >'. A horizontal line with upward-pointing arrowheads at both ends connects these two boxes, indicating a bidirectional relationship or association. Below this line, a third box represents 'Mezzanine::TerrainManager'. A vertical line descends from the center of the horizontal line to the top of the 'Mezzanine::TerrainManager' box, indicating that 'Mezzanine::TerrainManager' inherits from or is associated with the base class structure.
