

Mezzanine::ManagerBase

Mezzanine::Singleton< TimerManager >

Mezzanine::TimerManager

```
classDiagram
    class ManagerBase["Mezzanine::ManagerBase"]
    class Singleton["Mezzanine::Singleton< TimerManager >"]
    class TimerManager["Mezzanine::TimerManager"]
    ManagerBase <|-- Singleton
    ManagerBase --> TimerManager
```

The diagram illustrates the relationship between three classes in the Mezzanine namespace. At the top, two boxes represent 'Mezzanine::ManagerBase' and 'Mezzanine::Singleton< TimerManager >'. A horizontal line connects them, with an arrow pointing from 'Singleton' to 'ManagerBase', indicating inheritance. Below these, a third box represents 'Mezzanine::TimerManager'. A vertical line descends from the center of the horizontal line, and a horizontal line extends from it to the left, ending in an arrow pointing to 'ManagerBase', representing an association.
